

Practise dataset cleansing in Excel

This planning document is intended to support teachers who are delivering the NPA/PDA Data Science or for students who are learning independently. It also aligns with the Data Skills for Work framework.

The lesson has been designed for learners using Microsoft Excel. Most of the information in the lesson will work for other spreadsheets tools. However, if another tool is being used by the learners (such as Google Sheets) the step-by-step instructions will need to be adjusted.

Lesson Description

Lesson Overview	<p><i>Following on from the data cleansing and advanced data cleansing in Excel lesson.</i></p> <p>This lesson allows learners to practise the techniques learnt in the data cleansing lessons, specifically,</p> <p>Renaming variables Dropping unrequired rows/columns Dropping duplicates Handling missing/outlying data</p>
Topic	Data Manipulation and Data Analysis
Book Chapter(s)	Analysing data

NPA level	5, 6
PDA level	7, 8
Data skills for work level	Core, Analysis

Lesson Contents

This lesson consists of:

- A lesson plan (this document)
- A PowerPoint/PDF presentation, 'Practise dataset cleansing in Excel'
- Question worksheet (for learners) on 'Practise dataset cleansing in Excel' in Excel
- Answers worksheet (for teachers) on 'Practise dataset cleansing in Excel' in Excel/PDF

Learning Intentions

We will be learning how to apply data cleansing techniques to cleanse a dataset using Excel, specifically,

- how to rename variables
- how to drop unrequired rows and variables
- how to drop duplicates
- how to handle missing data and outliers

Success Criteria

I can *change* the name of a variable to a chosen naming convention in Excel

I can *remove* rows and variables in Excel

I can *remove* duplicate rows in Excel

I can *remove* rows which contain outliers in Excel

Knowledge Prerequisites

Learners should know:

- what a dataset is
- data can be used to solve problems and find answers to questions
- that data understanding is part of the analysis steps
- that data cleansing is part of the analysis steps
- how to identify missing and outlying values
- how to filter datasets in Excel
- difference between data types and display formats
- how to perform basic data cleansing in Excel
- how to perform advanced data cleansing in Excel

Lesson Requirements

	PDA	NPA	Data Skills for work
Qualification	Yes	Yes	Yes
Outcome ID(s)	WD7.2c, WD8.3e	DS5.2c, DS5.3c, DS6.2b	C2.1, A1.2, A2.1, A2.3
Outcome description(s)	WD7.2c Data cleaning WD8.3e Data cleaning	DS5.2c Describe methods of cleaning and transforming data DS5.3c Perform routine data cleaning and structuring. DS6.2b Perform data transformation to complete, correct and structure data	C2.1 Vocabulary used in data science and analytics A1.2 Data quality A2.1 Use of tools to analyse data A2.3 Data calculation and manipulation
Level	7, 8	5, 6	Core, Analysis
Software language	N/A	N/A	N/A
Required equipment /software for student	Lesson: PowerPoint/PDF, Worksheet: Excel	Lesson: PowerPoint/PDF, Worksheet: Excel	Lesson: PowerPoint/PDF, Worksheet: Excel

Task-types

In the worksheet for this lesson, there are up to 6 task-types to that become increasingly challenging to support the students learning. Based on the student's previous knowledge it is possible to select the task-types that are relevant to their stage.

Task-type	Description
1. Recall	To be able to recognise definitions or procedures.
2. Define	To be able to define definitions or procedures.
3. Rephrase	To be able to use their own words to describe definitions or procedures.
4. Apply	To be able to apply definitions or procedures to problem-solving activities.
5. Create	To be able to apply definitions or procedures and create their own solutions to a defined problem.
6. Active	Using knowledge from the lesson which they apply to scenarios they have researched/designed themselves.

Worksheet

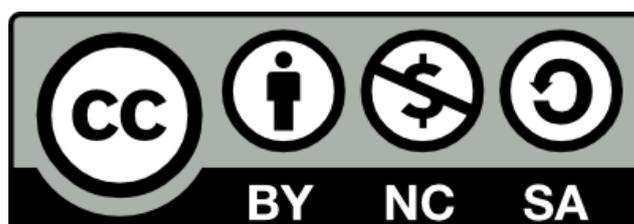

The worksheet associated with this lesson is available either in Excel or as a PDF that can be printed. The answer worksheet is available in both formats too.

Worksheet section ID	Description	Task-type	Number of questions
1.1	Renaming and duplicates	Apply	2
2.1	Handling missing/outlying values	Apply	5
2.2	Handling missing/outlying values	Apply	2
2.3	Handling missing/outlying values	Apply	3
2.4	Handling missing/outlying values	Apply	5
Total			17

How you can use this lesson
